April 2, 1984

For the first time since 1974, when South Carolina began publishing annual crime reports, every category of the seven index crimes shows a decrease. The index as a whole shows a decrease of 9.5 percent, murder a decrease of 7.8 percent, rape a decrease of 8.1 percent, robbery a decrease of 13.0 percent, and aggravated assaults a decrease of 13.4 percent. Non-violent crimes showed an overall decrease of 8.9 percent. These numbers are encouraging and speak well of the efforts of citizens, government, and the law enforcement community to combat crime in our state. Preliminary figures also indicate that crime nationwide was noticeably lower during 1983. Yet, even with such optimistic information we must not become complacent; we must continue our battle against crime in our state and nation.

I hope, as you must, that the decrease in reported crimes during 1983 is the beginning of a downward trend, but, that remains to be seen. Meanwhile, continued cooperation between the public and law enforcement is one way to work toward a goal of continuing decreases in crime.

Sincerely,

J. P. Strom

## BACKGROUND OF UNIFORM CRIME REPORTING

### NATIONAL UCR PROGRAM

Development of the current nationwide Uniform Crime Reporting (UCR) Program began over fifty years ago. In 1930, crime counts were first requested from local police departments with the Federal Bureau of Investigation (FBI) designated by Congress to collect, compile and analyze the statistics. The Committee on Uniform Crime Records of the International Association of Chiefs of Police (IACP) played a primary role in the origin and development of UCR and today serves in a strong advisory capacity. Standardized offense classification and counting procedures developed by the IACP are the basis for the UCR program. The National Sheriffs' Association (NSA) also serves in an advisory role to the national program, The publication, Crime in The United States, is the annual report published by the FBI dealing with national crime statistics.

In recent years the FBI has actively assisted states in the development of state level UCR programs compatible with the national system.

### SOUTH CAROLINA UCR PROGRAM

South Carolina was one of the first states to implement an operational state UCR program. The South Carolina Law Enforcement Division is the agency administering the program. The information collected and the uniform classification under which it is collected are based directly upon the guidelines developed by the IACP and FBI.

Upon initiation of the South Carolina UCR program in July, 1973, SLED, in conjunction with the FBI, held workshops around the state to instruct or refresh the county and city law enforcement agencies on the scope of the program and the mechanics of completing the forms.

Since that time, SLED, along with the local law enforcement agencies, has instituted an incident-based records management system which has greatly enhanced and improved the quality of information gathered under the Uniform Crime Reports system. Under this new procedure crime data and other information gathered by municipal and county law enforcement agencies are collected and submitted to SLED on a daily, monthly and annual basis. This new system lends itself to a more complete and accurate crime reporting system which in most instances alleviates some of the paperwork with which many departments have been burdened. An additional advantage of using standard incident and booking reports has been realized from the uniformity of documents. Standardized reports facilitate the exchange of information between law enforcement agencies within the state. The forms have been included in the report writing classes taught at the South Carolina Criminal Justice Academy.

### OBJECTIVES

The fundamental objectives of the South Carolina Uniform Crime Reporting Program are:

(1) To inform the governor, legislature, other governmental officials and the public as to the nature of the crime problem in South Carolina.

(2) To provide law enforcement administrators with criminal statistics for administrative and operational use.

(3) To determine who commits crimes by age, sex, race and other attributes in order to find the proper focus for crime prevention and enforcement.

(4) To provide base data and statistics to help measure the workload and effectiveness of the criminal justice system.

(5) To provide base data and statistics for research to improve the efficiency, effectiveness and performance of criminal justice agencies.

A particularly important goal of the state UCR program is to return statistical information to the contributors. With implementation of the new incident reporting system, participating police agencies furnish data that are verified, analyzed and then returned to each jurisdiction in the form of monthly printouts. Contributing agencies then possess detailed information showing crime trends within their jurisdictions. The information enables them to make decisions in budgeting, manpower allocations and the identification of high crime areas.

This information is also forwarded by SLED to the FBI on a monthly basis for inclusion in the FBI's annual UCR publication.

## REPORTING AND CLASSIFICATION

In reporting offenses to the Uniform Crime Reports program, offenses are classified according to standard definitions (given in a later section of the report) that are used throughout the nation. The UCR definitions are designed to insure that offenses with different titles under the laws of the various states are appropriately classified and counted under the UCR program without regard to findings of courts or juries, since the statistics are gathered primarily to assist in identifying areas of concern to law enforcement officers, and not meant to reflect the outcomes of inquests,hearings or trials.

## CRIME FACTORS

The presence of crime in our state's communities is a serious concern not only of the law enforcement profession but of society at large. Historically, the causes and origins of crime have been the subjects of investigations by many disciplines. However, no definitive conclusions have yet been reached. Instead, a number of factors affecting the volume and type of crime that occurs from place to place have been delineated. Some of these are as follows.

Density and size of community population and its surrounding area.
Variations in composition of the population, particularly age structure.
Stability of population with respect to transient factors.
Economic conditions, including job availability.
Cultural conditions, such as educational, recreational, and religious characteristics.
Climate.
Effective strength of law enforcement agencies.
Administrative and investigative emphasis of law enforcement.
Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional and probational).
Attitudes of citizenry toward crime.
Crime reporting practices of citizenry.

These and other crime influencing factors are present, to some degree , in every community, and their presence affects, in varying degrees, the crime experience of that community. Attempts at comparison of crime figures between communities should not be made without first considering the individual factors present in each community.

Police cannot shoulder the entire burden of fighting crime. The same is true of the courts, correction agencies, and any other elements of the criminal justice system. Real progress against crime can be attained only when each individual recognizes that crime prevention is his personal responsibility and acts accordingly.

## SOUTH CAROLINA CRIME INDEX

The tabulation presented in the tables, graphs, and charts in this publication indicate the volume, fluctuation, and distribution of crime in South Carolina on the basis of a crime index. The crime figures are categorized by agency, county and state on the basis of information submitted by

police agencies from these areas. The seven offenses comprising the crime index are:

1. Murder
2. Rape
3. Robbery
4. Aggravated Assault
5. Breaking Or Entering
6. Larceny
7. Motor Veh. Theft

Definitions of these seven offenses can be found elsewhere in this book under their separate headings.

The crime index is used as a basic measure of crime. The crimes were selected for use as an index on the basis of their serious nature, their frequency of occurrence and the reliability of reporting from citizens to law enforcement agencies. The offenses of murder, rape, robbery and aggravated assault are categorized as violent crimes. Offenses of breaking or entering, larceny and motor vehicle theft are classed as nonviolent crimes. The crime index is the total of these offenses that come to the attention of law enforcement agencies.

In reviewing crime index figures the reader should bear in mind that there is currently no way of determining the total number of crimes committed. The crime index has been established to measure only the instances of crime which come to the attention of law enforcement agencies. It is important to remember in reviewing the tables and graphs in this report that the volume of crime in a given area or municipality is related to the crime factors previously listed in this report.

## CRIME RATES

The crime rate indicates the number of Index Crimes per unit of population, generally per 10,000. It should be noted that the rate only takes into consideration the numerical factor of population and does not incorporate any of the other elements which contribute to the amount of crime in a given community. The effect of changes in population on rates should be kept in mind when attempting to make a comparison of crime rates.

The population data used in this report are supplied by the State Data Center, Division of Research and Statistical Services. The figures are based upon the latest projected population counts available from the State Data Center, July, 1983.

## PERCENT CHANGE

The percent changes in numbers of offenses and arrests from year to year are shown in a number of tables in this publication. The percent change shown after any 1981 figures reflect a comparison to information reported in 1980.

## VIOLENT CRIME

Crimes of violence include murder, rape, robbery and aggravated assault. Violent crimes involve the element of personal confrontation between the victim and the offender and, because of their nature, are generally considered to be more serious than nonviolent crimes.

## NONVIOLENT CRIME

For UCR purposes, nonviolent crimes include the offense of breaking or entering, larceny and motor vehicle theft. While these offenses generally do not involve personal danger to the victim, the value of property lost in these crimes is many times greater than violent crimes.

## ARSON

The offense of arson, defined for UCR purposes as any willful and malicious burning of any type of property, is included in this report. It has not been included in any trend data. Arson counts can be found in the section "Crime by County and Agency" as well as the "Arson" section.

## PERCENT ROUNDING

Percentages shown in this publication may not add to 100 due to rounding.

## UPDATED DATA

Any data published here concerning figures for prior years supersede those in previous reports.

## SOUTH CAROLINA CRIME CLOCK

one
**LARCENY**
every 6 minutes

one
**MOTOR VEHICLE THEFT**
every 1 hour, 7 minutes

The crime clock should be viewed with care. Being the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of occurrence of the Index Offenses. This mode of display should not be taken to imply a regularity in the commission of the Part I Offense; rather it represents the annual ratio of crime to fixed time intervals.

## CLEARANCE RATES

For crime reporting purposes, a crime index offense is cleared when a law enforcement agency has identified the offender, there is enough evidence to charge him and he is actually taken into custody. The arrest of one person can clear several crimes or several persons may be arrested in in the process of clearing one crime. Crime solutions are also recorded in exceptional circumstances when some element beyond law enforcement control precludes formal charges against the offender.

For the 1983 reporting period, 27.0 percent of all Index Crimes were cleared. The percentage of violent crimes cleared was 63.7 percent, while the clearance rate for nonviolent crimes was 21.5 percent. The figures compare with a total clearance rate of 25.5 percent for all Index Offenses, a violent crime clearance rate of 59.8 percent, and nonviolent crime clearance rate of 20.2 percent for the year 1982.

Murder is defined as the willful (non-negligent) killing or one human being by another except those cases classified as justifiable homicides. Under the UCR definition, justifiable homicides are specifically limited to the killing of an offender by a police officer in the line of duty or the killing of a felon by a private citizen. This definition does not take into consideration the findings of coroners' juries or other courts. Suicides are not defined as murders under UCR. Attempts to commit murder are classified as aggravated assaults.

## 1983 SUMMARY

A total of 321 murders was reported in 1983. During this year, the number of murders decreased 7.8 percent over those reported in 1982.

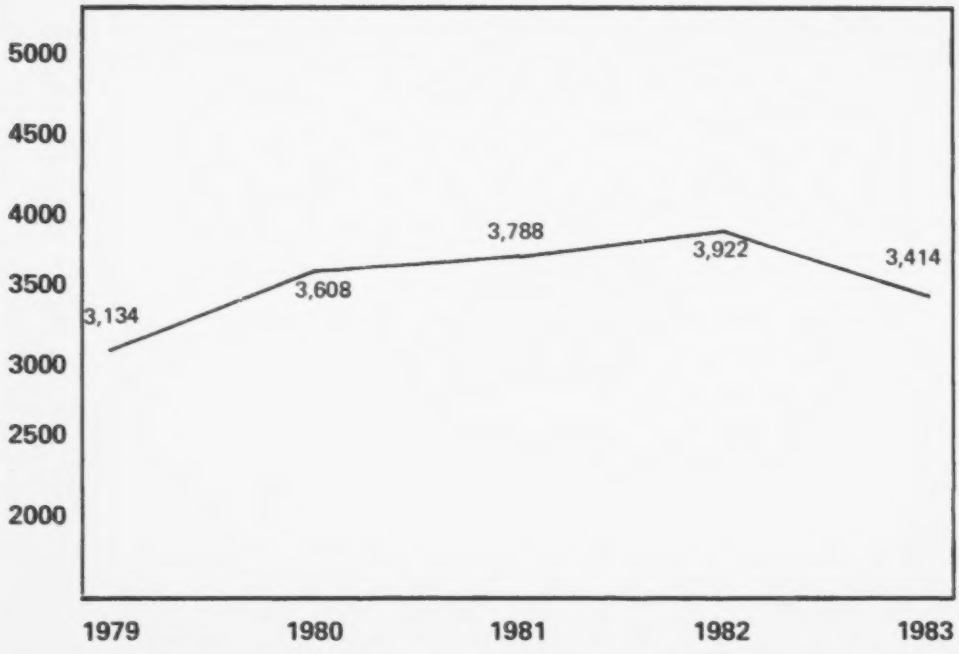
*One rape victim each in the 5–9, 25–29, and 30–34 age groups is designated OTHER race and is included in this Table under WHITE race.



Robbery, for UCR purposes, is defined as the unlawful taking of the property of another through the use or threat of force. Robbery is a violent crime in which the element of personal confrontation between the victim and offender is present. Attempts to rob are included in the robbery count. Armed robberies, those involving weapons, and strong-arm robberies, those not involving weapons, make up the two major categories. One robbery is counted for each distinct operation, regardless of the number of victims present at the time.

Breaking or entering, for UCR purposes, is defined as the unlawful entry of a structure with intent to commit a felony or theft. It is not necessary that force be used in gaining entry in order for the offense to be classified as an unlawful entry. Neither is it necessary that property loss occur in an unlawful entry or forcible entry for the crime to be counted in this category. Attempts to unlawfully enter a structure are also counted. One offense is counted for each distinct operation.

## 1983 SUMMARY

A total of 42,166 breaking or entering offenses was reported in 1983. During this year, breaking or entering offenses decreased 11.6 percent from those reported in 1982.

There were 7,689 breaking or entering offenses cleared by arrest or exceptionally cleared, amounting to a clearance rate of 18.2 percent.

Breaking or entering offenses accounted for 31.2 percent of all nonviolent crimes and 27.2 percent of the total crime index.

The breaking or entering rate in South Carolina was 135.3 per 10,000 population.

The age group of 25–29 accounted for 13.6 percent of persons arrested for breaking or entering. Males represented 95.0 percent of the total arrests made. Of all persons arrested for this offense, 50.1 percent were white, 49.7 percent were black and 0.2 percent were of other races.

Of the three categories of breaking or entering, forcible entry accounted for 82.9 percent, unlawful entry 7.7 percent and attempted forcible entry 9.4 percent.

The greatest number of breaking or entering offenses reported this year occurred at residences, accounting for over 59 percent of the total.

Night operations accounted for 26.4 percent of breaking or entering offenses, daytime operations 40.8 percent and 32.9 percent occurred at unknown times.

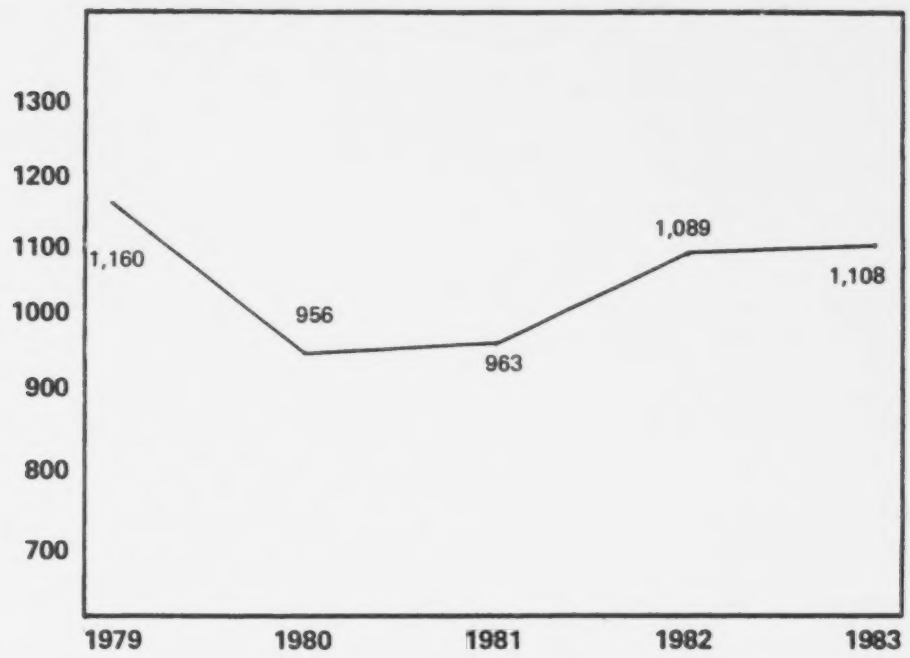
Arson, under the UCR definition, is the willful and malicious burning or attempts to burn, with or without intent to defraud, any structure, vehicle, private property or other property of any kind.

The U.S. Congress passed legislation in October 1978 requiring the collection of arson as a Part I Crime in the uniform crime reporting program. Consequently, during 1979 the South Carolina UCR program developed its own arson collection system. The year 1980 was the first full year South Carolina systematically collected, classified and counted arsons, regardless of whether they occurred in conjunction with other offenses. The reporting of arson data in South Carolina is enhanced by the cooperation of local fire service agencies.



## 1983 SUMMARY

During 1983 there were 1,108 assaults upon law enforcement officers, an increase of 1.7 percent from those reported during 1982. Of these 39.2 percent occurred while the officers were responding to disturbance calls, 18.4 percent while the officers were attempting to make general arrests, 11.8 percent while making traffic stops and 10.4 percent while investigating suspicious persons. There were 1,079 police assaults cleared by arrest or exceptionally cleared, amounting to a clearance rate of 97.4 percent statewide.

Of the 1,108 officers assaulted, 6.0 percent were assaulted with firearms, 5.3 percent with cutting instruments, 9.2 percent with other weapons and 79.4 percent with hands, feet, etc.

Some degree of injury was sustained by 16.3 percent of officers assaulted, 77.3 percent of these injuries were caused by hands, feet, etc.

Of the 1,108 assaults on officers 45.5 percent occurred between the hours of 8:00 PM and 2:00 AM.

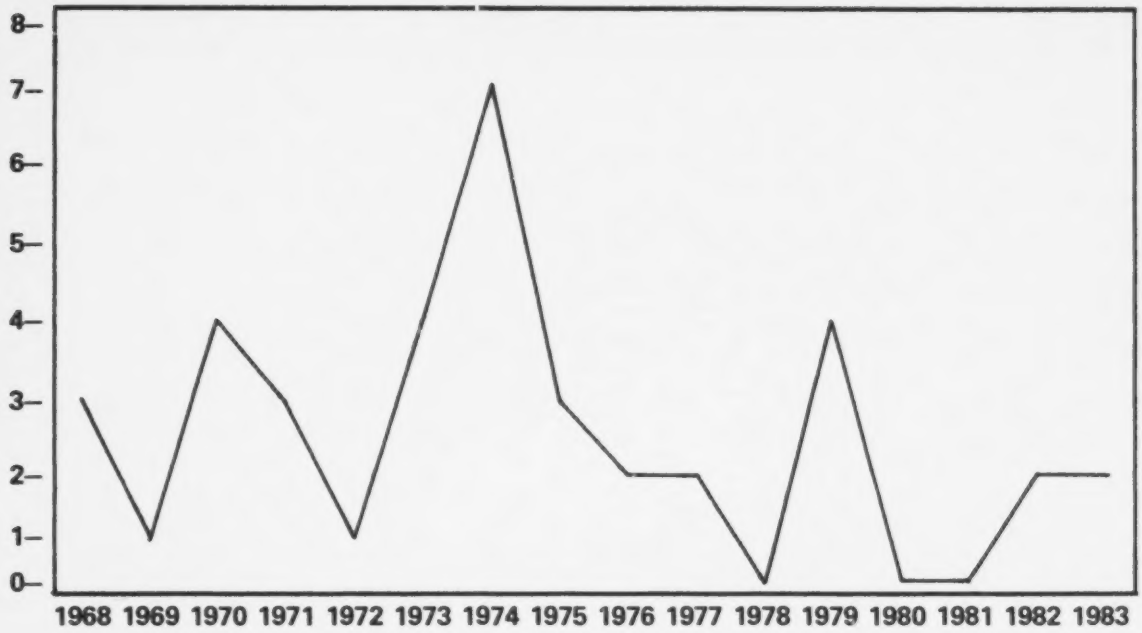
## SOUTH CAROLINA LAW ENFORCEMENT OFFICERS KILLED BY YEAR



In 1983, two South Carolina police officers were willfully killed in the line of duty.

A 29 year old officer was fatally injured by sniper fire from a .30 caliber carbine fired by a subject at close range while the officer wrote a traffic ticket for another person. The shooting was unrelated to the traffic stop. The officer had five days of police experience.

A forty year old highway patrolman stationed in Chester County was shot and killed with his own .38 caliber handgun while questioning a suspect stopped for a traffic violation.The suspect was driving a stolen automobile. The officer had sixteen years of police experience.

The Uniform Crime Report program requires a daily reporting of data concerning persons arrested in the state. Records of arrests for criminal acts in both Part I and II crime classes are received from state, county and municipal law enforcement agencies in South Carolina and are classified by offense category and arranged according to age, sex and race of persons arrested. Traffic arrests, except driving under the influence, are not reported. A total of 143,252 arrests for Part I and Part II crimes was reported during the year 1983, a 2.4 percent decrease from 146,717 arrests reported for the year 1982.

A person is counted on the arrest report each time he is arrested or summoned. It should be kept in mind that the volume of arrests may vary from time to time due to differences in local arrest procedures and policies. It should be noted that an individual may be arrested several times during a given month for different offenses. This occurs frequently for such crimes as public drunk, disorderly conduct and similar violations. A juvenile is counted as "arrested" when the circumstances are such that, if he or she were an adult, an arrest would be counted, or when law enforcement action or other official action is taken beyond a mere interview,warning or admonishment.

Whe reviewing arrest figures it should be remembered that arrest counts do not reflect the specific number of individuals arrested since, as has been pointed out, a single person may be arrested several times during any given month or year. However, arrest data are useful in measuring the extent of law enforcement activity in a given geographical area as well as providing an index for measuring involvement in criminal acts by the age,sex and race of the offenders.

Analysis of reported arrests for the year 1983 indicates that 18.8 percent of arrests during the year were for Part I offenses (murder, manslaughter, forcible rape, robbery, aggravated assault, breaking or entering, larceny, motor vehicle theft, arson). Arrests for larceny comprised the highest percentage of Part I arrest, amounting to 54.6 percent, while arrests for drunkenness comprised 24.8 percent of Part II arrests. Persons arrested for alcohol and drug violations (drug laws, DUI, liquor laws, drunkenness) accounted for 46.5 percent of all arrests made during the calendar year 1983.

County crime rates per 10,000 population and index crime counts by county and agency are shown in the two tables of this section. The crime rates in the first table are based upon the latest population counts available from the State Data Center, Division of Research and Statistical Services. County population projections are based upon a State population total of 3,316,600 for 1983. The number of months of active participation in the UCR program is indicated beside each agency name in the second table.
